

Planting Sunflowers

You will need:

- Seeds
- Soil
- Plant pots

1. Fill your plant pot with soil

2. Create a hole in the centre of the pot and put one sunflower seed in the hole.

3. Then cover it with soil and gently water.

Top Tip 

Keep the pot in a frost free place, a window sill is ideal. Keep the soil moist and wait for the seedlings to appear.

Fun Fact

The tallest sunflower ever grown was 25 feet tall. That's 762 cm! How tall will your sunflower grow? Measure it as it grows.
