

## Sun Catchers

You will need:

- PVA glue
- Food colouring
- String
- Plastic lids (lids from tubs of yoghurt, hummus, sour cream etc. work best)

1. Pour a generous amount of glue into one your plastic lids and swish it around to cover the entire inner surface.

2. Have your child out one or two drops of each colour of food colouring in the glue.

3. Let your child swirl the colours around the glue. Stop swirling before the colours get too combined or the final result will be brown.

4. Let dry. The glue will take a few days to fully dry. You will know it's ready when the edges start to peel off the lid. When fully dry make a hole through the top, add string, and hang in a sunny spot.
