

# Butterfly Symmetry

Things you'll need:

- Paper
- Paint

1. Fold the paper in half. Dribble or paint the shape of half a butterfly onto the folded edge of the paper.

2. Unfold the paper and sandwich the paper together and smooth the paint inside.

3. Unfold and leave to dry. And there you have your beautiful symmetrical butterfly.

## What is symmetry? 💡

Something is symmetrical when it is the same on both sides. A shape has symmetry if a central dividing line (a mirror line) can be drawn on it, to show that both sides of the shape are exactly the same.
