

# Halloween at home

Halloween is not cancelled this year! But to help you stay safe here are some ideas you could try at home.

**Pumpkin carving**— all you need is a pumpkin and a sharp knife. You could free hand your own design or download some from the internet, please make sure an adult is there to help young children

**Pumpkin soup**— don't waste those pumpkin innards' from your carving, you could make a lovely pumpkin soup. Have a look online for a yummy recipe.

**Host a virtual party**— why not hold a virtual party with your family & friends, you could play games, make a quiz and let the children show off their outfits.

**Decorate the house**— as well as the usual Halloween decorations why not go for a walk and collect some autumn leaves and pine cones to make it feel cosy and autumnal.

**Spooky spaghetti**— you can make spooky spaghetti by cooking some spaghetti until soft, drain and then add some food colouring. Mix the food colouring with the spaghetti until it is completely covered. You could either serve as part of a meal or add jelly worms and make a game out of it!

**Baking**— make some yummy biscuits with your family in different shapes which you could then decorate and have for pudding or if your more competitive turn it into a competition!
