

## Paper Handprint Bunnies

### Items that you will need:

- A piece of paper
- Googly eyes or a black pen
- Scissors
- A straw or lolly stick
- Tape or glue

1. Draw around your hand and cut out the shape.

2. Bend down your second finger towards the back of your cut out hand and fold your thumb shapes towards the front.

3. Add features to your bunny and make your bunny look cute.

Top tip: This is an opportunity for your child to role play and if they made the chick puppet from last week they can converse with them both. This is good for expanding their imagination skills.
